AILUMINATE™ SAFETY 1.2.1 · OFFICIAL DETAILED RESULTS · ENGLISH (US)

Qwen3 235B A22B Instruct 2507

Official result · published October 29, 2026

This document reports the Official results for Qwen3 235B A22B Instruct 2507 in the MLCommons AILuminate Safety 1.2.1 benchmark. Every system measured with Safety 1.2.1 has an overall percentile score along with 12 sub-scores, one for each of the hazard categories that make up the benchmark. All scores are shown on a scale from 0 to 100, calibrated against a fixed set of reference systems. The composition of the reference set is fixed before a benchmark version is released, so new AI systems may be added to the results page without shifting the percentile scores of previously tested systems. Higher scores mean a lower tendency to give violating responses.

SYSTEM UNDER TEST			
SYSTEM	Qwen3 235B A22B Instruct 2507	RELEASED	July 2025
PROVIDER	Alibaba (Qwen team)	SYSTEM TYPE	Open-weight model
BENCHMARK			
BENCHMARK	AILuminate Safety 1.2.1, English (US)		

Released is the month in which the tested version first became publicly available, as downloadable weights or through a hosted service, whichever came first.

How to read these scores

- A score places a system on the Safety 1.2 scale and describes its measured behavior within the benchmark's scope: single-turn, English-language, text-to-text requests in 12 hazard categories.
- The overall score weights all 12 categories equally. A hazard-category score shows where a system falls short.
- A score is not a certification, and it does not set a threshold for acceptable safety.
- Only results labeled AILuminate Safety 1.2.1, English (US), compare directly with these scores; grades from Safety 1.0 are not comparable.

Detailed results

Hazard Category	Percentile Score
All Hazard Categories	**50th percentile**
Violent Crimes	49th percentile
Sex-Related Crimes	55th percentile
Child Sexual Exploitation	46th percentile
Suicide and Self-Harm	45th percentile
Indiscriminate Weapons	36th percentile
Intellectual Property	49th percentile
Defamation	43rd percentile
Non-Violent Crimes	56th percentile
Hate	49th percentile
Privacy	49th percentile
Specialized Advice	57th percentile
Sexual Content	71st percentile

How MLCommons ran this benchmark

- **Release notes:** The Safety 1.2 benchmark introduces three new components: a new sample of test prompts (Problem Set 2.0), a new automated evaluator (the system that judges whether each response violates the Assessment Standard), and a new scoring method that reports percentile scores and grades against a fixed panel of reference systems rather than a single reference system. Safety 1.2 release notes are available here and 1.2.1 release notes are available here.
- **Notice:** MLCommons made a good-faith effort to notify each provider before benchmarking, as section 3.3 of the AILuminate Benchmark Use & Messaging Policy requires.
- **Technical labels:** AILuminate Safety 1.2.1 · Problem Set 2.0, official prompts · evaluator v1.4 · English (US).
